Here is the translation of the provided description into English:

A new residential project is available, consisting of a total of 7 apartments, located in an attractive area in Štinjan, 900 m from the nearest beach.

Apartment A7 (2nd floor), 65.70 m²

The largest apartment on the top floor. It features two bedrooms (10.80 and 12.50 m²), a bathroom, a spacious living room with a kitchen and dining area (25.40 m²), and the largest balcony in the building (7.50 m²). It combines the spaciousness and privacy of the top floor, making it an excellent choice for permanent living.

Quality and construction methods:
• Foundation on a reinforced concrete slab, built on a solid consolidated base
• Load-bearing structure made of reinforced concrete (MB 30) and load-bearing walls with a thickness of 25 cm
• Intermediate reinforced concrete slabs with a thickness of 20 cm, equipped with thermal and acoustic insulation for better soundproofing between apartments
• ETICS facade with 10 cm of graphite self-extinguishing polystyrene and water-repellent vapor-permeable silicate plaster, base made of plastered stone slabs
• Flat roof with TPO waterproofing membrane and 20 cm of thermal insulation, with thermal bridges resolved
• Multi-layered floors with waterproofing and floating screed,

first-class ceramics, anti-slip tiles on terraces
• Aluminum or PVC joinery with insulating glass (4+16+6 mm) and shutters on all openings
• Option to install anti-burglary entrance doors at the buyer's request
• Copper roofing and gutters
• Heating and cooling through a combination of inverter air conditioning units and underfloor heating
• Sanitary facilities equipped with first-class sanitary ware
• Controlled ventilation in bathrooms and kitchens without external openings
• Preparation for electric vehicle charging at the parking space
• High energy efficiency due to thick envelope insulation and quality joinery
• Landscaped surroundings with stone paths and horticulture

Key features of the building:
• Detached building with only 7 apartments (intimacy and low common costs)
• One apartment on the ground floor, three apartments on each floor
• Each apartment has its own balcony or covered terrace
• 11 parking spaces (10 outdoor and 1 garage)
• Room height of 270 cm
• Energy-efficient construction: ETICS facade, quality thermal insulation, flat roof with all necessary insulation
• Load-bearing structure made of reinforced concrete and Porotherm bricks (25 cm)
• Landscaped surroundings with greenery

The apartment includes 2 parking spaces included in the price.

The planned completion of construction and handover of the apartments is scheduled for September 2027.

**VAT is included in the price.
