relocation. Purchasing is exempt from real estate transfer tax as VAT is included in the price.

Modern Residential Building on Four Floors – A Combination of Functionality and Luxury

This residential project includes four apartments of different sizes spread over four floors, with additional facilities on the basement level:

Basement:

- Garage space with parking spots, including preparations for electric car charging (power supply channels).
- Private storage rooms for each apartment.

Access:

- Main entrance on the ground floor level with an external staircase.
- The building features an internal communication core with an OTIS elevator and enclosed staircases.

Apartment Design and Functionality:

Orientation:

- Living rooms face south or west, with access to balconies or terraces.
- Maximum storage utilization (built-in wardrobes in rooms and entrance areas).
- Spacious bedrooms with optimal layouts.

Heating and Cooling Systems:

- Heating: Underfloor heating powered by heat pumps (air-to-water), including hot water preparation.
- Cooling: Multi-split system with fan coils in living rooms and bedrooms.
- Bathrooms: Wall-mounted electric radiators for additional comfort.
- Outdoor Units: Placed on the roof to minimize noise and maximize yard usability.

Material and Construction Quality:

- Structure: Reinforced concrete monolithic construction (20-25 cm thickness).
- Partition walls: Gypsum board or aerated concrete, depending on space requirements.
- Flooring:  
Parquet in living and bedroom areas.  
Ceramic tiles in bathrooms and balconies (Italian quality).

-Insulation: ETICS facade system with 10 cm thermal insulation for maximum energy efficiency.

-Exterior joinery: Aluminum with electric shutters or blinds.

-Balconies: Modern glass spider railings emphasizing the contemporary look of the facade.

**Aesthetic and Functional Harmony**

The building facade is distinguished by a rhythmic design of balconies and terraces, creating a harmonious blend of modern design and practicality.
